SET MDA

WE BRING LIGHT TO RURAL PANAMA

SET MDA, the Sustainable Energy Team of Magen David Academy, is a 100% student-led club. We install complete solar energy systems in the homes of families who live without electricity.

[01] THE PROBLEM

WHEN THE SUN GOES DOWN, THE DAY ENDS

Most of Panama has power. The families who don't live far from the grid, in rural and indigenous communities where power lines don't reach.

191,400

PEOPLE IN PANAMA STILL WITHOUT POWER

[02] WHAT EACH HOME GETS

Solar panel. Mounted outside, it turns sunlight into electricity all day.

EcoFlow power station · 600 W · 245 Wh. Stores the day's energy and powers the home at night.

Light in the home. Phones charged, small devices running. No fuel, no power bill.

[03] HOW A TRIP WORKS

01 **Find a family**
We identify homes in rural Panama with no access to electricity.

02 **Raise the money**
Donations from our community pay for each home's full solar system.

03 **Travel & carry**
We bring everything to the house, sometimes on foot up the hills.

04 **Install together**
We mount the panel, connect the power station and wire light through the home, with the family.

05 **Power on**
The home has its own electricity. The lights come on.

[04] BUILT TOGETHER WITH

SET AIP · SET ISP · Diputado Gabriel Solís

SPONSOR A HOME

Fund a complete solar system for one family, from the panel to the first light. Every donation goes to equipment for the next homes.
